

# McAlway/Churchill

storm drainage improvement project

YOUR STORM WATER FEES AT WORK

June 2012

Dear Resident,

Charlotte-Mecklenburg Storm Water Services and engineering consultant, Parsons Brinckerhoff, Inc., are in the design phase of the McAlway/Churchill Storm Drainage Improvement Project. This project will improve storm drainage infrastructure and reduce street and structure flooding. Channel improvements to the creek will also be made to increase capacity and reduce erosion.

During the design phase, Parsons Brinckerhoff, Inc. will develop construction plans for the proposed storm drainage improvements. Once the preliminary construction plans are complete, we will hold a public

meeting to discuss the designed improvements and kickoff the easement acquisition phase. We expect to hold the public meeting later this year.

For more information about this project, please visit our website at <http://stormwater.charmeck.org> and click on **Storm Water Projects** drop down menu in the green bar, then **Active Projects and McAlway/Churchill**.

If you have any questions, please contact Project Manager David Baker at 704-432-5569 or [dtbaker@charlottenc.gov](mailto:dtbaker@charlottenc.gov).

## Did you know?

- The top two pollutants in Charlotte creeks are sediment and bacteria.
- The best way to control erosion is to plant something. Nothing holds soil in place better than plant roots.
- Soil testing in North Carolina is free. Take the guesswork out of fertilizer and lime purchases.
- Charlotte receives more rain than Seattle.
- Creeks start in Charlotte and flow downstream out of the County.
