

May 2016

OUR COMMITMENT TO YOU

Our goal is to minimize the impact of any construction. The designers of this project have taken great care to develop a construction plan that will minimize inconveniences to you. However, the very nature of this work often makes it necessary to temporarily reduce or detour traffic flow and close streets. We will help you locate parking if your driveway is blocked temporarily.

HEAVY CONSTRUCTION EQUIPMENT

This kind of work uses heavy construction vehicles, including dump trucks, concrete trucks and earth moving and trenching equipment, all of which are quite loud during operations. The contractor may keep equipment within the work area for the duration of the project.

OPEN HOLES AND TRENCHES

If it is necessary to maintain an open hole or trench, the contractor is required to make the area safe with fences, barricades or other methods. Please be cautious as you enter and exit your property.

McAlway/Churchill Storm Drainage Improvement Project

McAlway/Churchill Storm Drainage Improvement Project

Engineering & Property Management
Storm Water Services Division
600 East Fourth Street
Charlotte, North Carolina 28202

Charlotte-Mecklenburg Storm Water Services is ready to begin construction. City Council awarded Sealand Contractors Corporation the construction contract. Construction is scheduled to start this summer and is estimated to take two years.

Some common concerns regarding construction are listed on the flip side of this postcard. Please take a few moments to read this information to understand the temporary disruptions associated with drainage repair projects.
