

McAlway/Churchill

storm drainage improvement project

YOUR STORM WATER FEES AT WORK

October 2012

Dear Resident,

Charlotte-Mecklenburg Storm Water Services and engineering consultant, Parsons Brinckerhoff, Inc., are currently in the design phase of the McAlway/Churchill Storm Drainage Improvement Project. This project will improve storm drainage infrastructure and reduce street and structure flooding. Channel improvements to the creek will also be made to increase capacity and reduce erosion.

During the design phase, Parsons Brinckerhoff, Inc. will develop construction plans for the proposed storm drainage improvements. Once the preliminary construction plans are complete, we will hold a public

meeting to discuss the designed improvements and kickoff the easement acquisition phase.

For more information about this project, please visit our website at <http://stormwater.charmeck.org> and click on **Storm Water Projects** drop down menu in the green bar, then **Active Projects and McAlway/Churchill**.

This project has transferred to Project Manager William Harris. If you have any questions, please contact him at 704-353-1147 or wtharris@charlottenc.gov.

Maintain Your Drain

Clogged storm drains can cause street flooding.

BEFORE it rains, remove trash, leaves and other debris from storm drains near your home.
