

Meadow Ridge

storm drainage improvement project

YOUR STORM WATER FEES AT WORK

August 2011

Dear Resident,

Charlotte-Mecklenburg Storm Water Services recently notified citizens in the project area that surveyors would be on site to collect topographic data. Project engineers from W.K. Dickson will use this data to understand how to improve the drainage system. This project is in the beginning stages of planning with surveying being the first step.

Storm Water Services will be contacting property owners in the area within the next few months to discuss their requests for service due to flooding and erosion problems. This is part of gathering existing conditions information. We will analyze the existing system and to clarify where there are problems and how to correct

them. We appreciate input from property owners within the watershed.

For more information about this project or to fill out a property owner questionnaire please visit our website at <http://stormwater.charmeck.org> and click on **Storm Water Projects** drop down menu in the green bar, then **Active Projects** and **Meadow Ridge**.

If you have any questions, please contact Project Manager Danee McGee at dmcgee@charlottenc.gov or 704-336-4102.

Are you prepared for a flood?

Anywhere it rains, it can flood. And floods are Charlotte-Mecklenburg's most common and costly natural disaster.

In Charlotte-Mecklenburg, flood risks are especially high in the summer and early fall. Thunderstorms, tropical storms and hurricanes can cause heavy rain and flash flooding.

During a Flood:

- Pay attention to flood watches and warnings.
- **Turn around, don't drown!** Don't walk or drive through floodwater. 80% of flood deaths happen in vehicles.
- Be prepared to move to higher ground.
