

# Meadowridge

storm drainage improvement project

YOUR STORM WATER FEES AT WORK

February 2013

Dear Resident,

Charlotte-Mecklenburg Storm Water Services is in the design phase of the Meadowridge Storm Drainage Improvement Project. Consulting engineers W.K. Dickson has submitted the preliminary design plans and City staff is completing the review. A public meeting will be held in the spring to discuss the proposed improvements and initiate easement acquisition. The proposed improvements include culvert replacement, stream stabilization, storm drain improvements and utility relocations. The goals of the project are to replace failing infrastructure, reduce flooding of streets and structures and reduce erosion along the stream and channel.

For more information about this project, please visit our website at <http://stormwater.charmeck.org> and click on **Storm Water Projects**, **Storm Water Projects** again, then **Meadowridge**.

Please note this project has transferred to Project Manger Adrian Cardenas. If you have any questions, please contact him at 704-336-4682 or [acardenas@charlottenc.gov](mailto:acardenas@charlottenc.gov).

**It is that time of year when a chill fills the air and snow begins to fall.**

Sometimes, instead of snow, we get ICE. Next time the weather turns bad and your sidewalk is slick, spread sand to get a grip on that slippery walk.

If bad weather strikes the area causing limbs and brush to fall, residents are encouraged to prepare debris to normal collection guidelines (limbs no longer than 5 feet in length and no wider than 4 inches in diameter). The storm debris should be taken to curbside. Do not place debris in storm drains, gutters or on creek banks.
