

Meadowridge

storm drainage improvement project

YOUR STORM WATER FEES AT WORK

October 2012

Dear Resident,

Charlotte-Mecklenburg Storm Water Services and consulting engineer, W.K. Dickson, have started the design phase for the Meadowridge Storm Drainage Improvement Project. The preliminary design plans will be submitted by W.K. Dickson to the Project Team by March 2013. When the review is complete, a public meeting will be scheduled to discuss easement acquisition. The goals of this project are to replace failing infrastructure, reduce flooding of streets and structures and reduce erosion along the stream and channel.

The phases and timeframes of a typical storm drainage improvement project are:

1. Planning: *12-27 months (complete)*

2. Design: *21-34 months (current phase)*
3. Bid and Award: *4-5 months*
4. Construction: *3 months to more than 2 year*

Project updates will be mailed quarterly to keep citizens informed of construction progress.

For more information about this project, please visit our website at <http://stormwater.charmeck.org> and click on **Storm Water Projects, Storm Water Projects** again, then **Meadowridge**.

If you have any questions about this project, please contact Project Manager Danee McGee at dmcgee@charlottenc.gov or 704-336-4102.

Maintain Your Drain

Clogged storm drains can cause street flooding.

BEFORE it rains, remove trash, leaves and other debris from storm drains near your home.
