

February 2016

Charlotte-Mecklenburg Storm Water Services and Sanders Utility Construction Company continue with the construction phase.

The work of placing the 90" reinforced concrete pipe (RCP) along Oriole Street is complete; however, construction and restoration continues. The remaining work includes additional storm drain inlets and pipe, concrete driveways, curb, sidewalk and asphalt paving. Oriole Street remains closed at Lexington Avenue, but open to Morehead Street allowing access to Art's BBQ Restaurant, H&R Block and Duke Endowment.

Work continues in the westbound lanes of McDowell Street between Baxter and Morehead Streets. McDowell traffic remains in a shifted pattern, but one lane in each direction remains open while construction for the 90" RCP placement occupies the other lanes. Due to the deep trench construction, various utility conflicts and other restrictions, this section is now projected to be completed by mid-March. This section will connect to the tunnel portion under Morehead Street which is already constructed. Then traffic on McDowell Street can be restored.

Temporary construction traffic signage will direct motorists around the construction work zones. Please follow the detour signs and be alert for workers in the construction zone.
