

MM 90" Drainage Project, Blasting update

This is being sent to all property owners and tenants along the Charlotte Myrtle Morehead Drainage Project and also various agencies. This is to provide you with a project update for our proposed blasting. This message is the same as the last several emails.

The tunnel construction continues. The ground in the tunnel excavation continues as hard crystalline rock areas. Digging is still very difficult. We again plan on blasting to loosen the rock material so it can be removed. One shot of dynamite is currently scheduled for 9:00am Friday, March 6, and also 9:00 am Saturday, March 7. Once again, several things still have to happen prior the proposed blasting.

The tunnel path continues into rock so blasting could also continue a couple times per week if progress continues.

Please advise if you have any questions. I hope this information keeps you informed of the project's impacts on the area.

Tim Canup.
