

# Parkwood Phase I

storm drainage improvement project

YOUR STORM WATER FEES AT WORK

February 2013

Dear Resident or Property Owner/Manager,

Charlotte-Mecklenburg Storm Water Services will soon begin the real estate phase of the Parkwood Phase 1 Storm Drainage Improvement Project. This project will improve storm drainage infrastructure and reduce street and structure flooding. Channel improvements to the creek will also be made to increase capacity and reduce erosion.

During the real estate phase, we will hold a public meeting to discuss the designed improvements and initiate easement acquisitions. We expect to hold the public meeting within the next couple of months.

For more information, please visit our website at <http://stormwater.charmeck.org> and click on **Storm Water Projects** dropdown menu in the green bar, then **Active Projects** and **Parkwood**.

If you have any questions, please contact Project Manager David Perry at [dperry@charlottenc.gov](mailto:dperry@charlottenc.gov) or 704-336-4202.

It is that time of year when a chill fills the air and snow begins to fall.

Sometimes, instead of snow, we get ICE. Next time the weather turns bad and your sidewalk is slick, spread sand to get a grip on that slippery walk.

If bad weather strikes the area causing limbs and brush to fall, residents are encouraged to prepare debris to normal collection guidelines (limbs no longer than 5 feet in length and no wider than 4 inches in diameter). The storm debris should be taken to curbside. Do not place debris in storm drains, gutters or on creek banks.
