

# Peterson Drive

storm drainage improvement project

YOUR STORM WATER FEES AT WORK

April 2012

Dear Resident,

Charlotte-Mecklenburg Storm Water Services and consulting engineers, USInfrastructure, continue to acquire easements for the Peterson Drive Storm Drainage Improvement Project. The goals of this project are to reduce flooding of streets and structures, as well as reduce erosion along the stream and channel (thru stabilization) where needed.

The permitting phase will begin after the real estate phase is complete. During this phase, the required water quality permits are obtained from Federal and State governments. The permitting phase should last 3 to 4 months.

For more information about this project or detailed meeting minutes, please visit our website at <http://stormwater.charmeck.org> and click on **Storm Water Projects, Storm Water Projects** again, then **Peterson**.

If you have any questions about this project, please contact Project Manager Chad Nussman at 704-336-5676 or [cnussman@charlottenc.gov](mailto:cnussman@charlottenc.gov).

## Did you know?

- The top two pollutants in Charlotte creeks are sediment and bacteria.
- The best way to control erosion is to plant something. Nothing holds soil in place better than plant roots.
- Soil testing in North Carolina is free. Take the guesswork out of fertilizer and lime purchases.
- Charlotte receives more rain than Seattle.
- Creeks start in Charlotte and flow downstream out of the County.
