

Peterson Drive

storm drainage improvement project

YOUR STORM WATER FEES AT WORK

December 2013

Dear Resident,

The real estate phase is nearing completion for the Peterson Drive Storm Drainage Improvement Project. Gulf Coast Property agents have been contacting property owners if easements are needed to construct the proposed improvements. The project should be ready for the bid phase in summer/fall 2014. During this phase, competitive bids are taken from responsible contractors to perform the work. After City Council approval, the City awards the construction contract to the lowest responsible bidder. Bid phase typically takes six months.

For more information about this project, please visit our website at <http://stormwater.charmeck.org> and click on Storm Water Projects drop down menu in the green bar, then Active Projects and Peterson.

If you have any questions about this project, please contact Project Manager Brant Smiley at 704-432-2147 or bsmiley@charlottenc.gov.

Shade Your Stream

Property along creeks and lakes should be planted with native trees and shrubs.

ROOTS

Roots anchor the soil, reduce flood damage and take up excess fertilizers.

COOL TEMPERATURES

Shade keeps the water cool, allowing fish and aquatic life to thrive.

WILDLIFE HABITAT

Shaded streams provide valuable habitat for wildlife.

For more information about stream buffers, visit <http://stormwater.charmeck.org>
