

Princeton/Somerset

storm drainage improvement project

YOUR STORM WATER FEES AT WORK

March 2012

Dear Resident,

Charlotte-Mecklenburg Storm Water Services and consulting engineer, HDR, continue to move forward with the Planning Phase of the Princeton-Somerset Storm Drainage Improvement Project. The goals of this project are to improve the storm drainage infrastructure and to reduce flooding of streets and structures.

During the Planning Phase of the project, the consultant analyzes the storm drainage system within the neighborhood to determine areas where there are storm water issues and/or concerns. Several improvement alternatives are developed and evaluated to determine the best solution. A public meeting will be scheduled to present the preferred option and

solicit input from project area residents. Meeting details will be mailed to you two weeks prior to the meeting, tentatively scheduled for mid-summer.

For more information about this project, please visit our website at <http://stormwater.charmeck.org> and click on **Storm Water Projects** drop down menu in the green bar, then **Active Projects** and **Princeton/Somerset**.

If you have any questions about this project, please contact Project Manager Susan Tolan at stolan@charlottenc.gov or 704-432-0407.

Don't Let Washing Your Car Hurt Our Environment!

All of the storm drains in Charlotte-Mecklenburg flow directly to our lakes and streams. Dirty, soapy water from washing your car can pollute our surface waters.

- One gallon of liquid soap will pollute 200,000 gallons of water.
- Consider washing your car on a grassy area. Or better yet, take your car to a professional car washing center.
- Don't let soap suds go down the storm drain.
- Remember, only rain goes down the storm drain!
