

ROBINHOOD/DOOLEY
storm drainage improvement project

Dear Resident:

City Council awarded Ferebee Corporation the construction contract on October 8 for the Robinhood/Dooley Storm Drainage Improvement Project. Construction is scheduled to start in late December or early January and be complete by the end of March 2016.

Some common concerns regarding construction are listed on the flip side of this postcard. Please take a few moments to read this information to understand the temporary disruptions associated with drainage repair projects.

As construction begins, survey may be required and crews may need to enter your property to survey property lines and locate physical features. While State law authorizes this access to private property, no buildings or structures will be entered or disturbed. Utility companies will also be on site to relocate utility lines prior to construction.

For more information, please visit our website at <http://stormwater.charmeck.org> and click on **Storm Water Projects** drop down menu in the green bar, *then Active Projects and Robinhood/Dooley*.

If you have any questions, please contact one of the following team members:

On-site Construction Inspector:

Heather Broome: 704-634-1039
E-mail: hbroome@charlottenc.gov

Construction Supervisor:

Gary Stansbury: 704-336-2667
E-mail: gstansbury@charlottenc.gov

Project Manager:

David Perry : 704-336-4202
E-mail: dperry@charlottenc.gov

A construction inspector will be on site regularly to address any questions or concerns. Please note efforts are taken to minimize disruption to nearby property owners.

WHAT TO EXPECT DURING CONSTRUCTION

OUR COMMITMENT TO YOU

Our goal is to minimize the impact of any construction. The designers of this project have taken great care to develop a construction plan that will minimize inconveniences to you. However, the very nature of this work often makes it necessary to temporarily reduce or detour traffic flow and close streets. We will help you locate parking if your driveway is blocked temporarily.

HEAVY CONSTRUCTION EQUIPMENT

This kind of work uses heavy construction vehicles, including dump trucks, concrete trucks, and earth moving and trenching equipment, all of which are quite loud during operations. The contractor may keep equipment within

the work area for the duration of the project.

OPEN HOLES AND TRENCHES

If it is necessary to maintain an open hole or trench, the contractor is required to make the area safe with fences, barricades, or other methods. Please be cautious as you enter and exit your property.
