

# Tattersall

storm drainage improvement project

your storm water fees at work

July 2015

Charlotte-Mecklenburg Storm Water Services and consulting engineer, Dewberry Engineers, continue with the design phase. City staff has reviewed the design plans and Dewberry Engineers is addressing the comments. Once all comments have been addressed, a public meeting will be held to present the design. Meeting details will be mailed to you approximately two weeks in advance.

The project goals are to improve storm drainage infrastructure, reduce erosion and flooding of streets and structures.

## Waterways Need Plant Buffers

Buffers are trees, bushes, and deep rooted plants along a stream, pond, river or lake. They reduce property loss from erosion, support fish and wildlife, and improve water quality.

If my property is eroding, what can I do?

- Plant native bushes and trees!
- Leave grass unmowed.
- Keep herbicides away.
