

Tattersall

storm drainage improvement project

your storm water fees at work

Dear Resident:

Charlotte-Mecklenburg Storm Water Services and consulting engineer, Dewberry Engineers, continue with the design phase for the Tattersall Storm Drainage Improvement Project. The project goals are to improve storm drainage infrastructure, reduce erosion and reduce flooding of streets and structures.

Design work includes locating utilities, verifying pipe clearances, creating computer generated maps and resolving utility and pipe conflicts. Dewberry Engineers is working on the preliminary design plans. Once the preliminary design plans are submitted, City staff will review and make comments. Once all comments have

been addressed, a public meeting will be held to present the design. Meeting details will be mailed to you approximately two weeks in advance.

For more information about this project, please visit our website stormwater.charmeck.org. Click on **Storm Water Projects** dropdown menu in the green bar, then **Active Projects** and **Tattersall**.

If you have any questions, please contact Project Manager Harold Smith at hsmith@charlottenc.gov or 704-432-5532.

October 2014

HURRICANE SEASON JUNE 1 - NOVEMBER 30, 2014

2014 forecast:

- 11 named tropical storms
- 3 hurricanes

75% of Charlotte's flooding happens during the months of hurricane season. Whether it's heavy rain from a named storm or an unexpected cloudburst, Charlotte's flood chances increase dramatically in the summer.
