

Water Oak

storm drainage improvement project

your storm water fees at work

April 2015

Charlotte-Mecklenburg Storm Water Services and Mulkey Engineers & Consultants continue to work on the design phase. Potential utility conflicts have been coordinated and incorporated into the preliminary design plans. Once City staff reviews these plans, a third public meeting will be held to present the proposed design and initiate easement acquisition. Meeting details will be mailed to residents approximately two weeks prior to the meeting.

Waterways Need Plant Buffers

Buffers are trees, bushes, and deep rooted plants along a stream, pond, river or lake. They reduce property loss from erosion, support fish and wildlife, and improve water quality.

If my property is eroding, what can I do?

- Plant native bushes and trees!
- Leave grass unmowed.
- Keep herbicides away.
