

# Water Oak

storm drainage improvement project

your storm water fees at work

Dear Resident:

Charlotte-Mecklenburg Storm Water Services and Mulkey Engineers & Consultants continue to work through the planning phase of the Water Oak Storm Drainage Improvement Project. The consultant has analyzed the storm drainage system and developed different alternatives to address the drainage issues and concerns in the neighborhood. The alternatives have been analyzed and evaluated to determine the best solution.

Mulkey is finalizing the Selected Alternative report. Once this is complete, a public meeting will be scheduled to present the recommended alternative and solicit

input from residents. Meeting details will be mailed to residents approximately two weeks prior to the meeting.

For more information about this project, visit our website: <http://stormwater.charmeck.org>. Click on the **Storm Water Projects** drop down menu in the green bar, then **Active Projects** and **Water Oak**.

If you have any questions, please contact Project Manager Adrian Cardenas at 704-336-4682 or [acardenas@charlottenc.gov](mailto:acardenas@charlottenc.gov).

October 2013

When you clean your car, don't forget this detail:

Soap will clean your car, but it won't clean our streams.

Don't wash your car on your driveway or in the street. Soap suds flow to the nearest storm drain, then directly into the nearest creek. That could kill fish and other aquatic life.

Instead, park your car on your lawn to wash it. Or, better yet, take your car to a professional car wash where the water is cleaned. You'll have a clean car and all of us will have clean streams.
