

Harbor Drive Drinking Water System Extension

Charlotte Water will begin construction activities to install drinking water main pipes along Harbor Drive, Pine Cape Drive and Cold Harbor Drive in the coming months. With the installation of the Charlotte Water water mains, property owners will have the option to connect to the system and become Charlotte Water customers.

Project Strategy

Construction activities will begin near Moores Chapel Road and along Harbor Drive first. Material stockpiles will be stored near Street. The next phase involves installing the new water main pipes along Cold Harbor Drive and Pine Cape Drive. Crews will work in front of a few houses at a time proceeding from Litaker Ave. towards Morehead St. The third phase ties the new water mains into the existing system on Moores Chapel Road.

Service Interruptions

Property owners will remain Utilities Inc. customers during and after construction of the Charlotte Water mains. Water service interruptions are not expected. Any existing water service concerns should be directed to Utilities Inc.

Project Schedule

Charlotte Water staff estimate construction activities to last 90-100 days weather permitting.

Construction activities will occur between 8 a.m. and 4:30 p.m. Monday through Friday.

Charlotte Water Connections

Property owners in the project boundaries will have the option to become a Charlotte Water customer. *This option is completely voluntary.* A nearby company pre-paid for several homes in the project zone to be furnished with a connection tap to Charlotte Water if the customer chooses. However, customers will be responsible for paying for connecting from the Charlotte Water meter to their homes.

Project Updates

Please go to charlottewater.org and select "Projects" to view project updates.

Property Access

Construction activities will take place within the street right-of-way. However, driveway and sidewalk access may be limited at times.

Trash Pick Up

Residents should maintain their regular schedule for trash and recycling pick up. The construction inspector will ensure that construction activities do not disrupt trash collection.

Flushing

At times, crews will flush hydrants to move fresh water into new pipes. Residents may see water flowing from pipes and hydrants into nearby storm drains.

During Construction

Construction can be loud, dirty and inconvenient. Crews will be using heavy equipment and storing materials on-site. Please be aware of your surroundings near the construction site and report any safety concerns to the project inspector as soon as possible.

Service Line Installation

Charlotte Water can offer payment installments through the water bill for those customers who would like to have Charlotte Water install a service line connection from the meter to the home at the time of meter installation.
