

**Businesses are accessible and welcome your patronage. Look for these signs to stop in and support these businesses along the Blue Line Extension alignment.**

## APRIL 2016 CONSTRUCTION UPDATE

*Schedules are subject to change based on weather, site or unforeseen conditions.*

Spring is in the air and light rail station work is full speed ahead! The Blue Line Extension team is focused on bringing you information about the stations along the alignment. A light rail station is where you board the LYNX light rail vehicles, buy tickets, and start your journey. Currently, concrete is being poured and infrastructure is being installed for lighting and ticket vending stations.

Overhead Catenary System (OCS)

### Parkwood Station

Rail has been set and the overhead catenary system (OCS) installed at Parkwood Station. The contractor has installed the canopies for the station, but there is still more work ahead! The Art In Transit elements have yet to be installed at all of the Blue Line Extension (BLE) stations.

### 36th Street Station

Preparation for 36th Street Station is still underway. The station platform will be on the bridge and extend approximately 230 feet south. Currently, the contractor is grading in preparation for foundation construction.

### Sugar Creek Station

At Sugar Creek Station, a crew is welding the canopy frame and roof before it can be painted.

### University City Boulevard Station

The contractor has installed the electrical conduit at the University City Boulevard station. They will continue filling the foundation with stone and then pour the bottom platform slab. A pedestrian bridge will connect the elevator tower just north of the station to the University City Boulevard Parking Deck. This is the largest parking deck on the BLE with approximately 1,500 parking spaces!
