CORE FOUR PRIORITIES

Under Chief Jennings’s direction, CMPD will evolve to become the future organization that our staff, stakeholders & community are asking for. As members, we will focus on these Core Four strategies in every aspect of our work.

Community Collaboration
Community Collaboration is a process of participation by people, groups and organizations working together to achieve results. Each member must be willing to plan and share vision, mission, power, resources and most importantly, goals. Collaboration builds trust, ensures accountability and defines success.

What is our goal? A community that trusts and openly supports police.

Professional Accountability
Professional Accountability is a mindset of our employees to improve ourselves and the relations and outcomes we have with our customers and all the people we interact with and serve. As an agency we are transparent about corrective action and responsive to our community about how we police ourselves. We provide understandable data, information & stories about process & results.

What is our goal? Professional behavior is demonstrated by each of our employees.

Crime Management
Crime Management is how we work to prevent crime from occurring. It is working with each element of the crime triangle to find alternative outcomes for people involved in criminal activity.

What is our goal? Police, the criminal justice system and the community change a person’s behavior from crime to acceptable social norms through intervention and positive impact.

Employee Wellness
Employee Wellness is focused on supporting better mental and physical health at work for all employees. These efforts include physical and mental fitness programs, education and incentives, interventions for and improved access to care and social support for our employees.

What is our goal? Our workforce is actively engaged in physical, social, and emotional wellness activities.
CHARLOTTE-MECKLENBERG POLICE DEPARTMENT

2021-23 STRATEGIC PLAN

Updated Winter 2020
MESSAGE FROM CHIEF JENNINGS

The last several months have been spent listening to feedback and insights that will allow us to shape the future direction of our department.

From that feedback, we have developed the CORE FOUR strategic priorities that will guide the future of our organization as the world of policing changes.

**Employee Wellness** is any activity designed to support better mental and physical health at work; these efforts include physical and mental fitness programs, education and incentives, interventions for and improved access to care and social support for our employees.

We recognize the unique stresses our employees are experiencing. We will use research and employee feedback to better identify personal needs and apply resources to our organization for positive change and outcomes.

This includes safety, finance, work-life balance, growth, development and employee recognition and involvement.

**Professional Accountability** is an internally-driven mindset; a commitment to yourself and others to improve the interactions, relations and outcomes we have with our customers—all the people we interact with and serve. It is understanding your role and responsibilities and how they relate to our organizational goals.

It is vital that we as a police department have a strong customer service mentality throughout our organization. This must be consistent and an integral part of our culture.

Our uniform appearance, our training and performance evaluations, our internal checks and balances, even the daily work of how we police our communities—each of these areas are being reviewed and improved to ensure this value is strongly present at the core of our agency.

**Community Collaboration** is a process of participation by people, groups and organizations working together to achieve desired results. Each member must be willing to plan and share vision, mission, power, resources and most importantly, goals. Collaboration builds trust, ensures accountability and defines success.

We cannot successfully build trust-based community relations until we recognize how our citizens want to be served. This will require all of us coming together to make the community safer and CMPD better.

We must be willing to engage and collaborate with community activists, elected officials and anyone else who is willing to come together with reasonable, respectful and responsible dialogue to discuss how to move policing forward. This starts with each of you.

**Crime Management** is how we work to prevent crime from occurring and how we work with each element of the crime triangle to find alternative outcomes for people involved in criminal activity.

This isn’t crime reduction, rather a strategic approach to crime. We will use a heavy investment of departmental resources and initiatives to find alternative solutions to add to our standard tool kit.

We must involve stakeholders more effectively to find alternative solutions for low-level arrests and develop new partnerships for police work. Our efforts will be especially focused on reducing and preventing violent crime.

Our goal is to have the CORE FOUR established and functioning by January 1, 2021.

I appreciate the different opinions and ideas concerning the direction of the department. I respect and welcome the contribution and encourage you to continue to provide feedback about this process. *The only way we will achieve success is by working together.*
COMMUNITY COLLABORATION

Community Collaboration is a process of participation by people, groups and organizations working together to achieve results. Each member must be willing to plan and share vision, mission, power, resources and most importantly, goals. Collaboration builds trust, ensures accountability and defines success.

Where are we going? A community that trusts and openly supports police.

What can everyone at CMPD do to support Community Collaboration?

- Listen with an empathic ear.
- Be open to change and less resistant, defensive.
- Work together across silos toward one vision.
