What to Do if Your Device is Stolen

↑ If you are not certain whether your device has been stolen or if you have simply misplaced it, attempt to locate the device by calling it or by using the anti-theft software's GPS locator. Even if you may have only lost the device, you should remotely lock it to be safe.

↑ If the device was stolen, call 911 immediately. Make sure you meet with an officer at your location. Do not report the theft online or over the telephone. The faster police can track a device, the greater likelihood it will be recovered.

↑ Locate your device's make, model, serial number and IMEI or MEID number. Make sure you also have the user ID and password if utilizing anti-theft software.

↑ If you have installed anti-theft software on your device, use it to lock the phone, wipe sensitive information, and/or activate the alarm.

↑ As soon as possible report the theft or loss to your carrier. You will be responsible for any charges incurred prior to when you report the stolen or lost device. You can provide your carrier with the IMEI or MEID number, your carrier may be able to disable your device and block access to the information it carries. Request written confirmation from your carrier that the device was disabled.
