City of Charlotte, City Clerk's Office
City of Charlotte
FY96 & FY97 Budget Workshop
May 25, 1995
5:00-7:00 p.m.

5.00 Dinner & Announcements, Discussion of Budget Review Process

5.15-6:00 Focus Area Plan Reviews
City Within A City
Economic Development
Community Safety

6:00-6:45 Key Business Budget Discussion and Questions
Police
Neighborhood Development
Planning
Fire

6:45 Break and Adjourn to Public Hearing (scheduled for broadcast at 7:00)
FY96-FY97 Operating Budget
and
FY96-FY2000 Capital Investment Plan
Public Hearing

May 25, 1995
7:00 p.m.

1. Mayor’s Opening Remarks

   Purpose of Public Hearing
   City Manager’s Recommended Budget presented to Council on May 22nd for Review
   Several Workshops Scheduled for Budget discussion
   Introduces Budget Video

2. Budget Video Presentation

3. Speakers

4. Mayor Adjourns Meeting
City of Charlotte
FY96 & FY97 Budget Workshop
Handouts
May 25, 1995

Table of Contents

Questions and Answers from Media Briefing on May 22, 1995 . . . 135
Attachment 1 - User Fee Memo . . . . . . . . . . . . . . . . . . . . . . 137
The following questions were asked by the media during the Media Briefing on the Budget on May 22, 1995:

Q1. How many sidewalks can be constructed for $1 million?

32 miles of sidewalks are projected to be constructed with the $5 million in additional funding. Therefore, $1 million would construct approximately 6.5 miles of sidewalk (cost varies between $30 and $60 per linear foot based on slope, drainage, and right-of-way)

Q2. What are the top 5 locations on the sidewalk list?

Staff’s recommended top 5 sidewalks would be along the following thoroughfares:

- E. Sugar Creek between Academy Street and The Plaza
- Fairview Road between Park Road and Park South Drive
- South Boulevard between Scalybark and Woodlawn
- W Sugar Creek between Hidden Valley and Interstate 85
- Conference Drive between Independence Blvd and Monroe Road

Although funds would be divided equally between thoroughfare and non-thoroughfare streets, the first 5 on the priority list are thoroughfares.

Q3. When was the last transit fare increase?

September, 1991  Fares went from 70¢ to 80¢ for local service and $1.00 to $1.15 for express service

Q4. How many of the 141 eliminated positions are filled?

About 46 positions are still filled  The number decreases weekly as employees are either placed within or leave the organization
CITY OF CHARLOTTE  
CITY MANAGER'S OFFICE  
MEMORANDUM

TO: Mayor and City Council  
FROM: O. Wendell White  
City Manager  
DATE: May 25, 1995  
SUBJECT: FY96 User Fees

During the budget process the updated user fees are shared for your information.

I recommend that the FY96 user fees remain the same as in FY95. There are two reasons for this recommendation.

The KPMG Peat Marwick Permitting Process Review recommends that the City conduct an activity-based costing analysis to determine the appropriate level of fees.

This year department staff received training in activity-based costing and management. Instead of updating fees, time was spent learning how to improve our costing information.

The FY96 projected revenue from the City's user fees is approximately $570,000. Holding the fees at FY95 levels will have little impact on revenues.

There are four departments affected: Engineering and Property Management, Fire, Planning, and Transportation.

Customers will be notified of this decision shortly.
City of Charlotte
1995 Citizen Survey
Services Assessment Update

Background

The 1995 Citizen Survey was used to update the information received from the original 1992 services assessment process. Highlights of the citizen responses were presented to City Council at their May 1, 1995 workshop. Attached is the narrative portion of the report from MarketWise, Inc. who conducted both the citizen and Mayor/Council portions of the survey. The entire MarketWise, Inc. report, with data tables and cross tabulations of the results of each question by area of the city, length of residence in the City, age, gender and race is in the Council library.

The original services assessment looked at 41 major service categories within City government’s responsibility. In order to obtain the most useful data possible for the budget process, MarketWise staff suggested that only the lower priority services be included in this update survey and that those lower priority services be explored in more detail. Therefore, this report looks at the ranking of 12 of 15 lower priority categories (three were dropped because they were governed by ordinances or other legal mandates and couldn’t be cut or eliminated). These categories contained 53 specific services or programs which the City of Charlotte provides either directly or through contract with a private agency. The rankings were made by 409 randomly selected citizens, the Mayor and City Council and senior staff of City Government.

This report provides a comparison of the results of the senior city staff rankings, the Mayor/Council ratings and the citizen ratings for the portion of the survey questions dealing with the services assessment process.

Results

This data is intended to be an adjunct in the budget deliberation process. The report focuses on those services which received less than 50% support, defined to be a response of "high" or "very high" budget priority, from the citizens, Mayor/Council and senior staff. Fifteen of the 53 services included in the survey received less than 50% support from all three groups and are included in the list below.

The list below is in descending order, by the percentage of citizens ranking the service as a "high" or "very high" budget priority. The number included by each service is the citizen rating. See Table A for all three numerical rankings.

- Plant and maintain flowers and landscaping on City property (48%)
- Operate and maintain cemeteries (43%)
• Pick up and destroy unwanted / stray animals (41%)
• Rescue injured animals (41%)
• Historic Districts and Neighborhoods (40%)
• Mint Museum (39%)
• Contract for spay / neuter services (35%)
• Centralina COG (34%)
• Sister Cities (33%)
• Arts and Science Council (33%)
• Afro-American Cultural Center (32%)
• Pet Adoption Services (32%)
• Animal lost and found (31%)
• Art in public buildings (18%)
• Pressure wash Tryon Street Mall sidewalks nightly (17%)

The conclusions to be drawn from these results are that these services and agencies have less public, political and city management support than the other 37 services or agencies on the list. While some perhaps can be eliminated entirely, others could only be reduced in scope. In either case, reductions in these services would have less public impact than the other services listed in the survey.

Table A shows all 53 services included in the survey, ranked in order of citizen support. The first four columns (two each for city staff and Mayor/Council responses) show comparative data by average (mean) score and % ranking "high" or "very high" budget priority. The fifth and sixth column are the citizen responses.

It should be noted that only the lower third of the original list of 41 services from the 1992 services assessment process were included in the 1995 services assessment update.

BACKGROUND AND OBJECTIVES

The present study builds upon findings from the 1992 Assessment of City Services. The 1992 study identified and defined 41 service areas funded by the City of Charlotte. These service areas were tested and ranked in order of importance.

The 1995 study focuses on 12 of the 15 service areas that ranked in the bottom third (in terms of importance) in the 1992 service assessment. Three service areas were dropped from consideration because they were legally mandated services.

This study was designed to give the city detailed information and direction about service areas and specific programs that could be considered for funding elimination or reduction. Specific research objectives for this study were to:

- Measure overall perceptions of City Services
- Determine importance of specific services Charlotte City Government provides
- Determine citizens' views on City-County government consolidation
- Determine citizen's opinions about capital needs
- Measure willingness to pay more taxes

Study questions were worded with neutral phrasing to get respondents true opinions. The wording for specific service area programs were taken from City descriptions of the programs. Benefits or purposes of the programs were not included in descriptions.
METHODOLOGY

Telephone interviews were conducted with 409 City of Charlotte residents. The sample for telephone interviewing was purchased from Survey Sampling, Inc, and was drawn proportionally across all areas of the City. Areas of the City, as defined by zip code, are represented in the final sample as follows:

- North Charlotte: 14%
- South Charlotte: 43%
- East Charlotte: 33%
- West Charlotte: 10%

Survey participants were screened to ensure they were residents of Charlotte. One male or female head of household was randomly selected to participate in the study. This ensures that both males and females are represented in the final sample. The final sample consists of 48% males and 52% females.

MarketWise developed the survey questionnaire with input from the City of Charlotte. The final questionnaire was approved by the City and took 22 minutes on average to administer.

All interviewing was conducted from the MarketWise central telephone location under the supervision of a MarketWise staff member. Four dialing attempts were made to each sampled telephone number to ensure hard to reach respondents were included in the study, and that all sample members had an equal probability of being included in the final sample.

A sample size of 400 has a sampling error of plus or minus five percentage points at the 95% confidence level. This means that results from 95 out of 100 samples would vary no more than five percentage points (higher or lower) from results obtained if all members of the population were surveyed.
PERCEPTIONS OF CITY GOVERNMENT

Overall Performance

The average rating of overall performance for Charlotte City Government is 3.4. Overall performance was rated on a 1 to 5 scale where 1 was very poor and 5 was excellent. Chart 1 shows the percentage of respondents giving each rating on the scale. Almost half of the respondents (46%) rate overall performance as good, and 38% rate it as fair.

Chart 1

Overall Performance of Charlotte City Government

Citizens of West Charlotte (n=40) give City government a slightly lower than average rating for overall performance at 3.1. Almost a quarter of respondents (23%) from West Charlotte give a poor or very poor rating.
City Spending

The average rating for Charlotte City Government on spending tax dollars wisely is 3.0 on the same 1 to 5 scale where 1 means very poor and 5 means excellent. Forty-four percent of respondents rate City Government fair on spending (See Chart 2). Again respondents from West Charlotte give lower ratings (2.7 on average) than respondents from other areas of Charlotte.

Chart 2
Performance of Charlotte City Government
On Spending Tax Dollars Wisely

In general, respondents feel City government "wastes taxpayer money" on unnecessary services. Sixty-six percent of respondents in this study agree with this statement (35% agree somewhat and 31% agree strongly). Further, less than half (46%) of study respondents agree that City government "works to keep costs down" (33% agree somewhat and 13% agree strongly). Less than one third (31%) of respondents feel the City spends the right amounts of money for the services it provides.
Essential Services

As shown in Chart 3, the most important services the City provides are police/law enforcement (48%), garbage and sanitation services (33%), and fire/rescue services (26%). These are high priorities for all respondents regardless of area of residence in the City, length of residence, age, gender or race.

Charlotte City Government receives its highest ratings for providing essential services. The average rating is 3.9 on the 5-point scale. Sixty-four percent of respondents rate City Government good, and 15% rate the City excellent in providing essential services (See Chart 4).
The majority of respondents (71%) indicate a willingness to pay $10 more in property taxes a year to help fund essential services. Six percent of the respondents said they would pay $5 more per year. However, nearly a quarter (23%) of respondents are not willing to pay any more property taxes.

According to respondents, the best way for the City to get funds for essential services is through taxes. When asked how the City could get funds for essential services if there was a problem funding them at current levels, respondents said the City could raise taxes (19%), raise property taxes (15%) or raise other taxes like sin taxes or commuter taxes (13%). Other responses targeted spending practices where respondents suggested cutting spending (12%) or spending money more wisely (10%).
Support for Consolidation

Respondents show strong support for consolidating Charlotte City and Mecklenburg County governments. As Chart 5 shows, 61% of respondents say they would vote for consolidation if there were a vote today.

Chart 5
Acceptance of City-County Consolidation

Respondents support consolidation because they believe it will eliminate duplicated services and will save money (See Table 1). Twenty-three percent say consolidation will eliminate the duplication of services, while 20% say it will save money by not duplicating services. Another 15% simply say consolidation will save money.

Table 1
Reasons for Supporting Consolidation

<table>
<thead>
<tr>
<th>Reason</th>
<th>% of Respondents</th>
</tr>
</thead>
<tbody>
<tr>
<td>Eliminate duplication of services</td>
<td>23%</td>
</tr>
<tr>
<td>Save money by not duplicating services</td>
<td>20%</td>
</tr>
<tr>
<td>More efficient</td>
<td>17%</td>
</tr>
<tr>
<td>Save money</td>
<td>15%</td>
</tr>
<tr>
<td>City is the county anyway</td>
<td>14%</td>
</tr>
<tr>
<td>Lower taxes</td>
<td>12%</td>
</tr>
<tr>
<td>Government will run better</td>
<td>12%</td>
</tr>
</tbody>
</table>
Of the 409 survey participants only 24 (6%) oppose City-County Consolidation. Reasons respondents give for being against consolidation include: it will not be efficient, will put too much power in one place, the city and county have different purposes so they need to be separate, and taxes would be higher.

Thirty-three percent of respondents are undecided on the question of consolidation. Of these respondents, most say they need more information about the consolidation or they don’t know how services will be handled under consolidation.

Benefits of Consolidation

Respondents feel City-County consolidation will allow for better future planning and growth. Three-fourths (75%) agree strongly or somewhat with this statement. In addition, 72% say consolidation will save money, and 71% say it will allow for better services for citizens. Further, only 25% of respondents feel consolidation will create a big government bureaucracy.
CITY SERVICES

Service Area Rankings

Table 2 presents the current ranking of each selected service area, the 1992 rankings of each service area, and the aggregated mean rating of the service area. Aggregated mean ratings are computed by averaging the ratings of all the programs included in the service area.

The Customer Service Center and Urban Forestry service areas are single services - no additional programs make up these service areas. Therefore, their aggregated mean ratings are the same as the ratings of the single service area.

* The rankings based on the 1992 study have been altered to reflect relative importance rankings. In 1992, these service areas were ranked between 27 and 41. The number in parentheses indicates the 1992 ranking.

As this table shows, all selected service areas are of medium importance since ratings are primarily in the middle of the 1 to 5 scale. The most important services among those selected for this study are: Emergency Management, Funding to Community Agencies, Customer Service Center, and Collection of Miscellaneous Items. The least important service areas are Funding to Cultural Agencies, Public Information, and Maintaining the Central Business District.
Assessment of Service Area Programs

In all, 53 specific programs funded by the City were evaluated in this study. Table 3 lists the programs for each service area ranked in order of priority according to the average rating for each program. The table also shows the percent of respondents who give either a very high or high budget priority rating for each program.

From this chart we see that the programs have average ratings in the middle of the scale. This indicates a medium budget priority for the programs. There is low variation in the average ratings. Most programs have average ratings between 3.0 and 3.5 on the 5 point scale.

Looking at the percentage of respondents giving the top ratings shows more variability in the priority placed on the individual programs. From the percent of top ratings we see that just 19 programs are viewed as budget priorities (high or very high) by the majority of sample respondents (more than 50% give one of the top two ratings).

Emergency Management

Emergency Management has the highest aggregated mean rating (highest budget priority) of the twelve service areas. Three specific programs comprise the Emergency Management service area: natural disaster planning, response to hazardous materials incidents, and the nuclear emergency response program. Each of these programs was rated above the midpoint on the scale with the majority of respondents giving each a high or very high budget priority (See Table 4).

Funding to Community Agencies

This service area is ranked second overall. Of the programs included in this service area, United Family Services and Stop the Killing have the highest mean ratings (See Table 5). These programs are given a high budget priority by more than two-thirds of respondents. The Centralina Council of Governments and the Sister Cities programs get the lowest ratings with only about a third giving either a high budget priority.

Customer Service Center

Respondents were asked how high a budget priority it should be for the City of Charlotte to operate a Customer Service Center to provide a single place for citizens to get information, request service and register complaints. The average rating for this is 3.5 on the scale where 1 means not a budget priority and 5 means a very high budget priority. Fifty-four percent of respondents give it a high or very high rating.

Collection of Miscellaneous Items

Collection of Miscellaneous Items is provided by Solid Waste Services. The programs in this service area are all rated above the midpoint of the rating scale. As shown in Table 6 collecting and disposing of dead animals is the highest priority in this area with an average rating of 3.7 on the 5 point scale, and 62% of respondents giving it one of the top two ratings on the scale.

Community Relations

The highest priority program for Community Relations is police and neighborhood dialogues about crime prevention and City services with an average rating of 3.9. This is among the highest program ratings in the study. Table 7 gives the average ratings for all the programs included in Community Relations along with the percent of respondents rating at the top of the scale.

Landscape Maintenance

Of the programs included in the Landscape Maintenance service area, cutting brush and grass on City property and street rights-of-way has the highest mean rating at 3.6 with 59% giving one of the top two budget priority ratings. As Table 8 shows, less than half of study respondents consider planting and maintaining landscaping and operating City cemeteries budget priorities.

</tbody>
</table>

Urban Forestry

Respondents were asked to rate how high a budget priority it should be for the City to plant and maintain trees on City property and along City street rights-of-way. Respondents give this an average rating of 3.4 on the scale with half (50%) of respondents saying it is a high or very high budget priority for the City.

Street Cleaning

Street Cleaning includes flushing dirty streets and sweeping all City streets on a regular schedule. Flushing dirty streets is a higher priority for respondents with a rating of 3.6 (63% rating high or very high) than sweeping streets with an average rating of 3.2 and just over one-third (38%) rating it as a high or very high budget priority (See Table 9).

Animal Control

Animal Control encompasses the largest number of programs among the service areas tested in this study. Table 10 lists the programs included in Animal Control and gives the mean rating and percent of respondents rating the program as a high or very high budget priority. The highest priority programs under Animal Control are picking up and destroying dangerous animals (3.9) and providing rabies control (3.8). The lowest priority ratings are given for providing pet adoption services (3.0) and providing animal lost and found services (3.0).

Funding to Cultural Agencies

Funding to Cultural Agencies is one of the three least important service areas evaluated in this study. With an aggregated average rating of 3.1, it is a medium priority service area for respondents. The highest priority program under Funding to Cultural Agencies is Discovery Place a mean rating of 3.5 and just over half (55%) of respondents giving it a high or very high budget priority rating (See Table 11). Next is the Nature Museum at 3.4. Art for New City Buildings receives the lowest rating of any specific program in this study at 2.4 on the 5 point scale. Only 18% of respondents give this program a high or very high budget priority rating.

Maintain Central Business District

This service area has the lowest aggregated mean rating of any service area. Table 13 gives the average ratings of each program in this service area and the percent of respondents who think the individual programs are high or very high budget priorities for the City of Charlotte. Pressure washing Tryon Mall sidewalks nightly has the lowest percent of high or very high ratings in this study with a resulting average rating of 2.5.

</tbody>
</table>
CAPITAL PROJECTS

Importance of Capital Projects

Respondents place high importance on the Capital Projects tested in this study. The aggregated mean rating for Capital Projects is 3.8 on a scale where 1 means not at all important and 5 means essential. Chart 6 shows the percentage of respondents rating each type of capital project very important or essential.

The majority of respondents rate all Capital Projects either very important or essential. Respondents put their highest priorities on infrastructure issues with the highest importance ratings going to improving busy intersections (80%), widening and constructing city roads (78%), extending water and sewer lines (74%), and locating police bureau stations in neighborhoods (72%). However, neighborhood improvements like curbs, gutters and sidewalks have just 59% of respondents rating them very important or essential.
Funding for Capital Projects

A modest increase in property taxes specifically to support Capital Projects has strong support among survey respondents. Sixty-five percent are willing to pay $10 more a year in taxes. When respondents were asked if they would pay $5 more per year in property taxes, another 8% responded positively. However, 27% of respondents are not willing to pay more taxes to fund Capital Projects.

Suggestions for getting funding for Capital Projects center around bonds and taxes. Eighteen percent of respondents say the City should issue bonds to pay for Capital Projects, and 35% say the City should raise taxes (property, sin, luxury taxes). Another 22% say the City should cut spending, and 12% of respondents suggest having fund raisers.

Community Safety Plan

12 Police Districts

Notes:
Community Safety Plan

Mission

The Mission of the Community Safety Plan is to:

◊ Develop an integrated, comprehensive, five year plan for the City of Charlotte to best utilize its resources to reduce crime and to increase the perception of community safety;
◊ Determine an approach to crime that includes prevention, intervention and enforcement strategies;
◊ Position neighborhoods for self-sufficiency;
◊ Identify types of offenders (i.e., violent, youthful, substance abusing, repeat) on which to focus efforts;

Notes:
Community Safety Plan
Mission (Continued)

The Mission of the Community Safety Plan is to:

◊ Participate with the Mecklenburg County Commission, the Charlotte-Mecklenburg School Board, and the State of North Carolina to improve the criminal justice system; and
◊ Provide an annual evaluation of goals and strategies

Notes:
Notes:
Community Safety Plan

Decrease Crime

- Strengthen partnerships between residents, business owners and police
- Improve conditions in distressed neighborhoods and business areas
- Protect and maintain stable neighborhoods and business areas
- Help individuals become self-sufficient
Community Safety Plan
Decrease Crime

FY96-97 Budget:
♦ Crime in Charlotte decreased 4.4% in 1994 with a 10% decrease in violent crime
♦ Currently, 98 Community Policing Officers are assigned to 206 neighborhoods

Notes:
Community Safety Plan

Violent Crime

◊ Decrease use of guns in criminal acts
◊ Decrease domestic violence and impact on children
◊ Increase police resources in dealing with violent crime

Notes:
Community Safety Plan
Violent Crime

FY96-97 Budget:
◊ New Domestic Violence Unit funded
  ($438,657)
◊ Homicide Section has increased from 15
to 22 officers
◊ Homicide's 1994 clearance rate was
  90%, well above the national average

Notes:
Community Safety Plan
Youthful Offenders

- Coordinate children services
- Promote family self-sufficiency
- Work jointly with Schools
- Increase public and private efforts
- Increase resources to focus on youth crimes
- Determine appropriate rehabilitation programs

Notes:
Community Safety Plan
Youthful Offenders

FY96-97 Budget:

- The SHOCAP Program will link Police, District Attorney, Court System, Dept. of Corrections and School System in an information system
- Youth Bureau has increased from 12 to 17 officers and support staff ($781,332)
- The Serious Juvenile Crime Unit targets repeat offenders ($396,000)

Notes:
Community Safety Plan
Substance Abuse

- Decrease demand for drugs and alcohol
- Decrease supply of drugs and alcohol
- Coordination of the treatment programs and accountability to judicial system

Notes:
Community Safety Plan
Substance Abuse

FY96-97 Budget:

- Street Drug Interdiction activities increased from 22 to 34 officers ($1.4 million)
- Street drug interdiction activities are more closely linked to community policing

Notes:
Community Safety Plan
Repeat Offenders

- Focus on successful programs
- Assist parolees to remain crime free
- Make Parole Board aware of higher incidence of crime in Charlotte-Mecklenburg and criminal history of candidates for early parole

Notes:
