The invocation was given by Councilman Claude L. Albee.

MINUTES APPROVED

Upon motion of Councilman Dellinga, seconded by Councilman Wilkinson, and unanimously carried, the minutes of the meeting on May 20th were approved as submitted.

ORDINANCE PERMITTING GRATES ON SIDEWALKS WHEN APPROVED BY CITY ENGINEER UPON SPECIFIC PERMISSION BY THE CITY COUNCIL

Mr. Paul R. Erwin, Attorney representing the Addison Building Corporation, advised that the Addison Storage Garage at 218 South Church Street is being converted into an office building, and in order to install the necessary transformers, it is necessary to place a grating in the sidewalk, which is now prohibited by the City.

The City Manager advised that an ordinance is being presented for consideration today that will permit the requested installation if adopted.

The ordinance entitled: "ORDINANCE NO. 179 PERMITTING GRATES ON SIDEWALKS WHEN APPROVED BY THE CITY ENGINEER UPON SPECIFIC PERMISSION BY THE CITY COUNCIL", was introduced and read. Councilman Albee moved the adoption of the ordinance as presented, which was seconded by Councilman Wilkinson, and unanimously carried. The ordinance is recorded in full in Ordinance Book 11, at Page 308.

REQUEST OF ADDISON BUILDING CORPORATION TO INSTALL FUEL OIL TANK UNDER SIDEWALK AT 218 SOUTH CHURCH STREET DEFERRED

Mr. Paul R. Erwin, Attorney representing the Addison Building Corporation stated that in the development of an Office Building from the present Addison Storage Garage at 218 South Church Street they wish to install a 8,000 gallon capacity fuel oil tank in the space the storage tank has heretofore been, and it will be necessary for the tank to extend from 3 to 3½ feet under the sidewalk; that under the Fire Prevention Code the maximum capacity of such tanks is 5,000 gallons. Deputy Fire Chief Joe Morris, Director of the Fire Prevention Bureau was present at the request of the City Manager, and explained in detail the location of the tank; the regulation relative to the capacity of such tanks, and the capacity recommended by the National Board of Fire Underwriters. He stated that it is their opinion that the installation of an 8,000 capacity tank will create a fire hazard in view of the quantity of gasoline that could leak out should the tank become defective. He advised that since there is a retaining wall at the location, the Bureau will approve the installation of two 4,000 gallon tanks; however, he understands there is an engineering problem involved in this installation.

Following the discussion, it was suggested that Mr. Erwin and Chief Morris discuss the matter further and see if something satisfactory to both cannot be worked out, and if not then the request will be further considered at the next Council meeting.
