Northbound Beam Road at Shopton Road.

## Beam Road and Shopton Road Roundabout Project

The design plans are complete and utility coordination is nearing completion. City staff continues to work with the North Carolina Department of Transportation on approvals required to begin real estate acquisition this spring. During this phase, real estate representatives work with property owners to acquire easements necessary for construction. Once all the easements have been acquired, the project will be bid for construction.

Construction is expected to begin in fall 2017. To expedite project completion, the intersection of Shopton and Beam Road will close for approximately four to five weeks. A few weeks in advance of the closing you will be sent detours and other pertinent information.

This project will convert the existing four-way stop intersection into a single lane roundabout. Improvements will include crosswalks, new sidewalk, planting strips, pedestrian refuge islands, landscaping, street lighting and bike lanes.

We will continue to keep you informed on the status of this project. We appreciate your patience.
