Wastewater Improvements Are On The Way

Brandywine Pump Station Elimination Project
**WHAT:** Charlotte Water (CLTWater) and RH Price Construction are planning to install a new wastewater pipe to eliminate the Brandywine Wastewater Pump Station on Brandywine Drive.

**WHEN:** Construction is estimated to start early May 2020. Construction is estimated to be complete by end of May 2020.

**WHERE:** Installation of the new pipe will occur in construction easements. The pump station will be removed and restored to grass. Crews will access area via Polo Club Boulevard and Brandywine Drive.

**WHAT TO EXPECT:**

**Clearing** - CLTWater removes trees, shrubs, bushes, and other vegetation inside the construction easement before installing the wastewater pipe. When and where possible, trees on the edge of the temporary construction easement are preserved.

**Pipe delivery and storage** – Pipes, large manholes, and other materials are delivered and stored within the construction easements and road right-of-ways.

**Establishing a safe work zone** – Fencing will be put in place and pipe will be stabilized to prevent it from moving.

**Trench digging**

**Customers may feel a rumble** - Crews may remove rock formations by use of small blasting. Areas along the alignment where blasting is required will be determined shortly after site clearing. Residents within a 500 foot radius of the blasting sites will be contacted. Blasting is a standard construction procedure and all safety precautions will be taken. Residents may hear a warning horn and feel a slight vibration or rumble similar to a slammed door or thunder.

**Construction traffic** (excavators, dump trucks) will be within the easements. Roads will be open during the project.

**PROJECT CONTACTS:**

Project Coordinator - Stephen Scott, 980-219-9488 or Stephen.Scott@charlottenc.gov.

Project Inspector - Tim Milam, 704-995-7486
Timothy.Milam@charlottenc.gov.
