

SUBJECT: Upcoming Construction Project

Dear Customer:

Charlotte Water (CLTWater) is about to construct the Taggart Creek Sewer Outfall Project to provide for existing and future sewer needs. This project will generally run parallel to Billy Graham Parkway and Minuteman Way. All easements have been obtained and the construction contract has been awarded to Park Construction.

Within the next month, the survey firm of Survey and Mapping Control Inc. will survey along the route of the project. In doing so, it may be necessary for City of Charlotte and/or Hazen and Sawyer/Survey and Mapping Control Inc. staff to enter upon your property to conduct surveys and other work related to this project. In addition, Park Construction staff and/or their subcontractors will be accessing the route for preconstruction investigations.

The Project construction will take two years to complete. Work will begin in January on the South portion of the Project and finish at the Airport/Minuteman Way. Please see the attached map on the reverse side of this letter showing the layout.

All authorized personnel should have proper identification and stay within the easement areas or public rights of way.

I am your source of information for this project. Please call me at 704-634-8562 if you have questions. Thank you for your cooperation and patience as we move forward with this important project.

Regards,

Julie McLelland, PE
