What is the Streets Map?

- Map of the arterial street network (with collectors and some local streets/greenways)
- Includes a cross-section and center line measurement for each street
- Reflects and implements adopted policies
- Creates clarity, consistency, and predictability

How is it Used?

- Forms the basis for capital projects
- Referenced in and supports TOD Districts
- Provides expected cross-section to complement development
- Provides predictable measurement from center line to curb line
- Provides “frontage” information (determines setbacks, streetscapes, and other design/dimensional standards)
