Charlotte’s Transportation Goals

Streets are about more than traffic. They’re also about creating great places and offering great transportation choices. This requires building a transportation network of complete streets that accommodate pedestrians, bicyclists, transit riders and motorists.

Charlotte has been planning for and implementing complete streets for almost 20 years. The following plans and policies support Charlotte’s transportation goals:

- Transportation Action Plan
- Urban Street Design Guidelines
- Charlotte WALKS
- Charlotte BIKES
- Vision Zero Action Plan

What are we trying to achieve?

- Accommodate growth
- Complement land use vision
- Create safe streets for all users
- Provide transportation choices
- Support livable neighborhoods
- Provide access and mobility
- Efficiently move people and goods
