Congestion Mitigation - Steele Creek Road includes two projects: Steele Creek Road at Shopton Road West and Steele Creek Road at Sam Neely Road. These projects, currently in design, will help address congestion at the intersections of Steele Creek Road/Shopton Road West and Steele Creek Road/Sam Neely Road in the interim of the North Carolina Department of Transportation (NCDOT) NC160 Widening project.

These two projects are not part of NCDOT's NC160 project, and NCDOT will build upon these two projects when the NC160 project plans to hit ground in 2027.

A right turn lane will be added to the north leg of the intersection of Steele Creek Road and Sam Neely Road. An additional northbound through lane will be added at the intersection of Shopton Road West and Steele Creek Road, and a new left turn lane will be installed at Riverdale Drive and Steele Creek Road.

We will continue to keep you informed on the status of these projects. To view the preliminary concept plans visit the project website charlottenc.gov/cm.

Questions? Contact **Brooke England**, P.E. project manager, at brooke.england@charlottenc.gov or 704-534-8150.
