

Subject: Field Work as Part of Upcoming Sewer Improvements Investigation & Design Project

Dear Customer:

Charlotte Water (CLTWater) will be conducting field investigations in your area for an important wastewater project that will ensure ongoing service for our customers in Davidson. Some residents received a similar letter in December 2019 as part of the initial planning and investigation efforts. An expanded investigation area has been established, and field investigation work will begin soon.

The goal of this project, "Davidson South Street Wastewater Improvements Project," is to investigate and design necessary improvements to the sewer system. The field investigation corridor will generally run on South Street, Hillside Drive, Lorimer Road, Concord Road, and North Thompson Street (see map on the following page).

This letter is to notify you that authorized representatives working on behalf of Charlotte Water will be working on or near your property on one or more occasions during the project's investigation and design phase.

During this period, it may be necessary for Charlotte Water and authorized representatives' personnel to enter upon your property to access sewer manholes, perform survey, perform soil borings for geotechnical evaluation, and conduct additional investigations as may be necessary. Their activities should not inconvenience you in any way.

All field crew are instructed to wear identifying clothing (i.e. companies' logo or a safety vest) to identify themselves. In addition to personnel, residents could see minor clearing activities in the area, survey stakes/flags, paint markings on the ground, and small machinery used for geotechnical borings, if necessary. A list of companies that are involved with this project is included below:

- Propst Construction
- AECOM
- Yellow Duck Marketing
- Capstone
- RDL Locating
- JAAMCO
- Bartlett Tree Service
- CES Group Engineers

Additional information, including further technical details, can be found on Charlotte Water's website at: charlottewater.org. Click on Projects, then Construction. Charlotte Water is also working with a Design Build team to design and construct a new water main to better serve our customers in Davidson, and you can find additional information and updates about this project on our website as well.

If you have any questions about this project, please contact me at 980-219-9488 or stephen.scott@charlottenc.gov. Thank you for your cooperation and patience as we move forward with this important project. Additional notifications will be provided as this project progresses.

Regards,

Stephen Scott
