Wastewater Improvement Project Update

Doby Creek Wastewater Pipe
Replacement Project

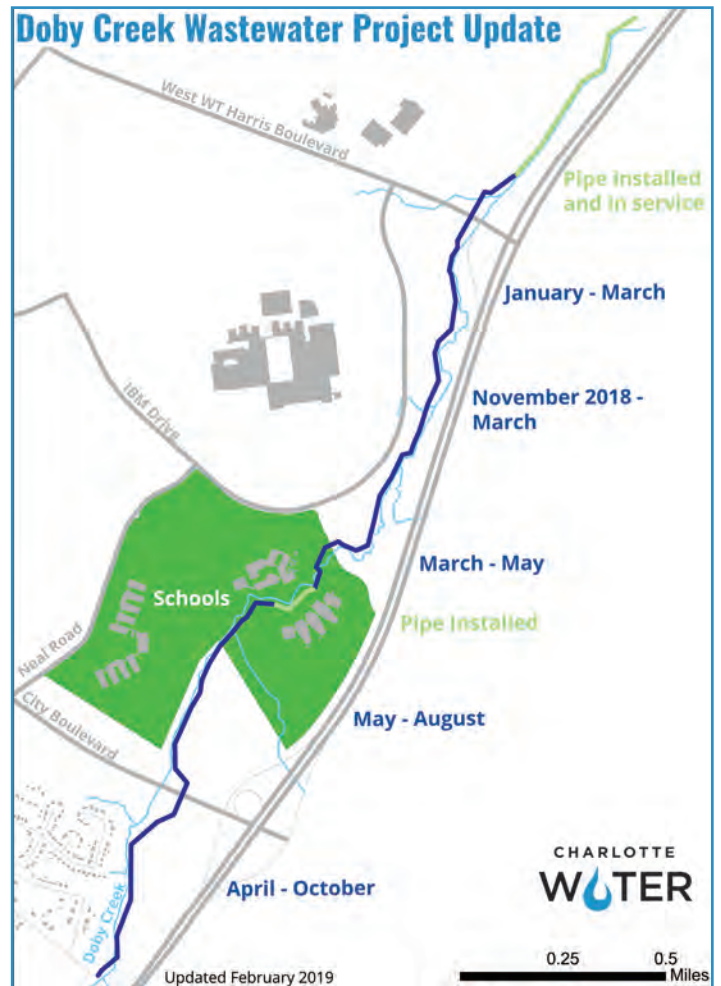

Wastewater Improvement Update

BRS Inc., under Charlotte Water's supervision, continues installing a new wastewater pipe along Doby Creek near West W.T. Harris Boulevard and IBM Drive. The project is estimated to be complete in late fall.

WHAT TO EXPECT

- Construction can be loud, dirty, and inconvenient. Crews will be using large excavators and storing materials on construction easements.
- **Clearing** – Trees, shrubs, bushes and other vegetation within the construction easement area will be removed. Debris will be transported off site.
- **Pipe delivery and storage**
Pipes and other equipment are delivered and stored within the construction easements.
- **Establishing a safe work zone**
Fencing will be put in place and pipe will be stabilized to prevent it from moving.
- **Trench digging.**
- **Placing pipe and backfilling.**
- **Underground rock blasting** to install the pipe. Residents may hear a warning horn just prior to the blast. The area will be monitored with seismographs to gauge earth vibration levels as required. Blasting is a standard construction procedure and all safety precautions will be taken.
- **Construction traffic** in the easements and road right-of-way. Once pipe is installed near your property, you may continue to see construction traffic along the easements until the pipe is tested, manholes are adjusted and restoration is complete.

SAFETY:

Please be aware of your surroundings near the construction site and report any safety concerns to the project inspector as soon as possible.
