FRAZIER AVENUE REALIGNMENT PROJECT

Construction is underway on the Frazier Avenue Realignment Project, identified in the City’s Comprehensive Neighborhood Improvement Program. The goal of this project is to help improve the street network, support redevelopment efforts and provide safe access to the CityLYNX Gold Line Phase 2 project.

The CityLYNX Gold Line project will extend the streetcar system two miles west from the Charlotte Transportation Center to French Street and a half mile east from Hawthorne Lane and 5th Street to Hawthorne Lane and Sunnyside Avenue. See reverse for details.
Construction of the Frazier Avenue Realignment Project is underway and improvements are being built with the CityLYNX Gold Line Phase 2 Project. The contractor is clearing and excavating land on the corner of West Trade Street and Frazier Avenue in preparation for the new roadway. In February 2018, a new storm drainage system will be installed on West Trade Street. Once the storm drainage is complete, the contractor will begin improvements on Frazier Avenue from Montgomery Avenue to West Trade Street.
