Water Pipe Replacement Project**

charlottewater.org

Drinking Water Improvement Project

Charlotte Water (CLTWater) is starting construction to replace existing drinking pipe under Little Sugar Creek. Construction may start in October and should be complete by January 2019.

During Construction

Construction can be loud, dirty and inconvenient. Crews will be using heavy equipment and storing materials on-site. Construction will take place beside the road in the road right-of-way. Any damages due to construction will be restored. Please be aware of your surroundings near the construction site and report any safety concerns to the project inspector as soon as possible.

Property Access (Driveway)

Construction activities will take place within the street right-of-way and greenway area. Driveway access may be limited at times. If you need assistance, please talk to contractor or call project inspector.

Lane Closures and Street Parking

Street parking may be restricted in the immediate area. Flaggers will help drivers navigate around any lane closures.

Planned Water Outages

Staff will notify affected customers of planned water outages 72-hours in advance. Any unplanned water outages are considered emergencies and will be repaired as soon as possible.

Discolored Water is Possible

Construction may cause temporary cloudy, discolored water or lower than usual pressure. If you experience some discoloration in your water:

1. Run the cold water from your outside spigot or tub for 15 minutes.
2. When the water runs clear, run cold water through any taps where discolored water is present.
3. If not clear, call 311 to report issues.

Flowing Hydrants

Residents may see water flowing from hydrants as part of construction activities.
