# Water Enhancements Starting Soon

## Suttle Avenue

Drinking Water Pipe Replacement Project

# Water Pipe Replacement Project

Starting the week of July 19th, Charlotte Water (CLTWater) and contractor HG&L Development, LLC will start extending water pipe under Suttle Avenue near West Morehead Street to Isom Street to enhance water service to the area. Another contractor will be working on water pipe on Wilkinson Boulevard (Suttle Avenue to West Morehead Street).

## During Construction

Construction will last an estimated four months. Construction can be loud, dirty and inconvenient. Crews will be using heavy equipment and storing materials on-site. Construction will take place beside the road in the road right-of-way. Please be aware of your surroundings near the construction site and report any safety concerns to the project inspector as soon as possible.

## Property Access (Driveway)

Construction activities will take place within the street right-of-way. However, driveway and sidewalk access may be limited at times. If you need assistance, please talk to contractor or call project inspector. Please alert us to invisible fence, irrigation systems, and other underground improvements to your home near the street.

## Lane Closures and Street Parking

Street Parking may be restricted when construction is in the immediate area. Flaggers will help drivers navigate around any lane closures.

## Water Outages

In the unexpected event of a water service interruption, the issue will be treated as an emergency and repairs will be made to restore service as quickly as possible.

## Flowing Hydrants

Residents may see water flowing from hydrants as part of construction activities.
