

Little Hope Creek Wastewater Improvement Project: Phase 2

You're invited to attend a community meeting

If you would like to receive text alert notifications for this project, please text **littlehopecreek** to **844-753-0614**.

You're invited to a virtual public meeting to learn more about upcoming construction work for wastewater system improvements in your area.

Contractors for Charlotte Water, led by Park Construction, will begin construction for Phase 2 of the Little Hope Creek Wastewater Improvement Project in March. Phase 2 starts at Seneca Place and follows Little Hope Creek to the intersection of Hartford Avenue and Belton Street (see map). Crews are nearing completion of Phase 1 of the project, which runs from Tyvola Road to Seneca Place. Once completed, the project will enhance the wastewater system in the community and protect the water quality in the creek.

During the virtual presentation, project representatives will share more details about the wastewater system capacity needs, proposed plans and construction activities. Participants will be able to submit questions during the WebEx Event, which will be addressed during the meeting's Q&A.

Virtual Public Meeting
Wednesday, February 16, at 5:30 p.m.

To register and for more information on this project, please visit the project webpage at bit.ly/LittleHopeCreek or by visiting charlottenc.gov/littlehopecreek. If you're unable to attend the meeting, a recording will be added to the webpage for playback. If you have questions, please contact Charlotte Water project manager Stephen Scott at Stephen.scott@charlottenc.gov or 980-219-9488.
