

# MICHAEL BAKER BRIDGE REPLACEMENT PROJECT

Utility relocations have caused some delays on this project. See reverse for details.

INVESTMENT  
PLAN** Creating Charlotte's  
Future, Together.

# CLTFUTURE

[CharlotteNC.gov/projects](https://CharlotteNC.gov/projects)

Utility relocations are expected to be complete by October 2017, followed by the bid phase (a six month process). During the bid phase, the City takes competitive bids from responsible contractors to perform the construction work. Construction is expected to start in 2018.

This project will replace the bridge on Michael Baker Place that spans Briar Creek with a structure that will handle cars as well as pedestrians. The design includes sidewalks and an upgraded classic concrete bridge rail. The project team will continue to keep you informed on the status of this project and appreciates your patience.

If you have any questions please contact the project manager Allison Brickley at 704-621-5916 or [abrickley@charlottenc.gov](mailto:abrickley@charlottenc.gov).
