April 2021

**WHAT:** Charlotte Water (CLTWater) will install gravity sanitary sewer (wastewater) and serve properties on Nannie Potts Lane.

**WHEN:** Construction is estimated to start the week of April 26th or May 3rd 2021. Construction will take at least three weeks.

**WHERE:** Installation of the new pipe will occur in construction easements and the road right-of-way. Crews will start on Willow Pond Lane.

**WHAT TO EXPECT:**

**Clearing** - CLTWater removes trees, shrubs, bushes, and other vegetation inside the construction easement before installing the wastewater pipe. When and where possible, trees on the edge of the temporary construction easement are preserved.

**Pipe delivery and storage** - Pipes, large manholes, and other materials are delivered and stored within the construction easements and road right-of-ways.

**Establishing a safe work zone** - Fencing will be put in place and pipe will be stabilized to prevent it from moving.

**Trench digging.**

**Construction traffic** (excavators, dump trucks) will be within the easements. Roads will be open during the project. Flaggers will assist drivers around the construction area.
