Construction is Coming To Your Area Soon

Paw Creek Wastewater Pipe Replacement Project
Charlotte Water (CLTWater) and Dellinger Construction will install a new wastewater pipe to serve customers in the Paw Creek area.

Construction will start early April and be complete by the end of May 2020.

Construction will start near I-485 in construction easements and road right-of-ways.

**WHAT TO EXPECT**

- **Clearing** - Starting early April, crews will remove a 40-to-50 foot wide area of trees, shrubs, bushes within the construction easement. Debris will be mulched or transported off-site. When and where possible, trees are preserved along the edge of the permanent easement.

- **Pipe delivery and storage** – Pipes, manholes, and large equipment are delivered and stored within the construction easements and road right-of-ways.

- **Establishing a safe work zone** – Fencing will be put in place and pipe will be stabilized to prevent it from moving.

- **Trench digging** (five to twenty-feet+ deep)

- **Customers may feel a rumble** - Crews may remove rock formations by use of small blasting. Areas along the alignment where blasting is required will be determined shortly after site clearing. Residents within 500 foot radius of the blasting sites will be contacted. Blasting is a standard construction procedure and all safety precautions will be taken. Residents may hear a warning horn and feel a slight vibration or rumble similar to a slammed door or thunder.

- **Construction traffic** (excavators, dump trucks) along the creek, within the easements or road right-of-way.

- The frisbee golf course at Robert L Smith Regional Park will be closed during construction.

**QUESTIONS:** Please visit the project website at www.charlottewater.org (click on “projects” then Paw Creek Wastewater Project) for updates on progress.
