Construction Update

Paw Creek Wastewater Pipe Replacement Project
Wastewater Improvement Update

WHAT: Charlotte Water (CLTWater) and Dellinger Construction are installing a new wastewater pipe to serve customers in the Paw Creek area.

WHEN: Construction started April 2019 and will be complete by the end of September 2020.

WHERE: The first pipe installation crew is working near the Beckinghall Drive Bridge. They will be on the eastern / downstream side of the bridge starting January 2020. The second pipe installation crew is working on Robert L. Smith Regional Park property near the Running Deer Road. A tunneling crew is almost complete at the Beckinghall Drive Bridge and will start under Little Rock Road in early 2020.

WHAT TO EXPECT:

- **Pipe delivery and storage** – Pipes, manholes, and large equipment are delivered and stored within the construction easements and road right-of-ways.

- **Customers may feel a rumble** - Crews may remove rock formations by use of small blasting. Areas along the alignment where blasting is required will be determined shortly after site clearing. Residents within 500 foot radius of the blasting sites will be contacted. Blasting is a standard construction procedure and all safety precautions will be taken. Residents may hear a warning horn and feel a slight vibration or rumble similar to a slammed door or thunder.

- **Construction traffic** (excavators, dump trucks) along the creek, within the easements or road right-of-way.

- The frisbee golf course at Robert L Smith Regional Park is closed during construction.

QUESTIONS: Please visit the project website at www.charlottewater.org (click on “projects” then Paw Creek Wastewater Project) for updates on progress.
