Construction is Coming To Your Area Soon

Piney Grove Neighborhood
Water Pipe Replacement Project

charlottewater.org

Drinking Water Improvement Project

Starting late April or early May, Charlotte Water (CLTWater) will start construction to replace existing 2-inch galvanized steel pipe (GSP) water mains with new 2 and 6-inch water mains within the areas listed below:

1. Studley Road from Amelia Drive to the dead end (3100 block).
2. Piney Grove Road from Heatherdale Court to Haverstraw Court.
3. Guster Court from Corder Drive to dead end.
4. Cloughy Circle from Winchelsea Drive to the dead end.
5. Winchelsea Drive from Monfrefya Court to the dead end.
6. Sandy Glen Court from Piney Grove Road to the dead end.

During Construction

Construction will last five months. Construction can be loud, dirty and inconvenient. Crews will be using heavy equipment and storing materials on-site. Construction will take place beside the road in the road right-of-way. Please be aware of your surroundings near the construction site and report any safety concerns to the project inspector as soon as possible. Learn more at charlottewater.org (Projects, Construction, Piney Grove).

Property Access (Driveway)

Construction activities will take place within the street right-of-way. However, driveway and sidewalk access may be limited at times. If you need assistance, please talk to contractor or call project inspector. Please alert us to invisible fence, irrigation systems, and other underground improvements to your home near the street.

Lane Closures and Street Parking

Street Parking may be restricted when construction is in the immediate area. Flaggers will help drivers navigate around any lane closures.

Planned Water Outages

Staff will notify affected customers of planned water outages 72-hours in advance. Any unplanned water outages are considered emergencies and will be repaired as soon as possible.

Discolored Water is Possible

Construction may cause temporary cloudy, discolored water or lower than usual pressure. If you experience some discoloration in your water:

1. Run the cold water from your outside spigot or tub for 15 minutes.
2. When the water runs clear, run cold water through any taps where discolored water is present.
3. If not clear, call 311 to report issues.

Flowing Hydrants

Residents may see water flowing from hydrants as part of construction activities.
