Field Investigations are Coming to Your Area Soon

McMullen Creek Wastewater Basin Study
Wastewater Field Investigations

WHAT:

Current Work
Charlotte Water is conducting a rehabilitation study of the McMullen Creek wastewater system. Studies will ensure pipe performance and provide increased wastewater capacity for current and future customers. In your neighborhood you can expect:

• Field investigations by City contractors, including Brown and Caldwell, Frazier Engineering, and Pipe Pros. Field crews will be wearing identifying clothing (i.e. companies' logo or a safety vest) to identify themselves.

• Work will take place along McMullen Creek, within the Charlotte Water easements. Crews will be working between the hours of 8 am-5 pm.

• CCTV equipment will be used to inspect wastewater pipes. You may also see contractors operating the equipment, trucks used for transporting materials, and/or off road vehicles used to operate machinery.

Coordinated Work in the Area
As a result of these studies, your neighborhood may also be a candidate for wastewater pipe rehabilitation work. If so, Charlotte Water will send additional communications leading up to the work taking place.

Charlotte Water also has a wastewater improvement project in your area already underway. The McMullen Creek Tributary to Coltsgate Wastewater Improvement Project is currently in the planning stages and is in the field investigation and survey phase. More information can be found at Charlottewater.org. Click on Projects, then Construction.

WHEN: January-February 2020

WHERE: This study will include sewers near McMullen Creek between Lancaster Highway in Pineville and Monroe Road.

QUESTIONS:
Please visit the project website at Charlottewater.org (click on Projects then McMullen Creek Wastewater Basin Study) for updates on progress.

If you have questions, please call Dr. Irene (Tesha) Okioga at 704-336-1063 or irene.okioga@charlottenc.gov or Katie Heer at 704-336-1073 or katie.heer@charlottenc.gov.
