Construction is Coming To Your Area Soon

Little Sugar Creek Tributary Wastewater Pipe Replacement (Edgewater Drive to Rosecrest Drive)
Wastewater Pipe Improvements

WHAT: Charlotte Water (CLTWater) and Atlantic Coast Construction with State Utilities will install a new wastewater pipe to serve customers in the Starmount Neighborhood.
- Crews will begin near the end of Edgewater Drive at Little Sugar Creek and work their way upstream.
- Roads like Edgewater Drive and Candlewood Drive will be temporarily closed when construction crosses the roads.
- When finished the project will enhance pipe performance and protect the water quality of Little Sugar Creek Tributary.

WHEN: Construction will start in early November and last at least nine months.

WHERE: Construction of the new pipe will occur in construction easements along Little Sugar Creek Tributary.

WHAT TO EXPECT:
Clearing - Starting in November crews will remove a 30-to-50 foot wide area of trees, shrubs, bushes within the construction easement beside the creek.

Pipe delivery and storage – Pipes, manholes, and large equipment are delivered and stored within the construction easements and road right-of-ways along the project.

Trench digging (5-to-16 feet deep)

Customers may feel a rumble - Crews may remove rock formations by use of small blasting. Areas along the alignment where blasting is required will be determined shortly after site clearing. Residents within a 500 foot radius of the planned blasting sites will be contacted. Blasting is a standard construction procedure and all safety precautions will be taken. Residents may hear a warning horn and feel a slight vibration or rumble similar to a slammed door or thunder. A seismograph monitor records blast vibrations to verify they are within safe specifications.

Construction traffic - Excavators and dump trucks in easements along the creek and neighborhood streets to access the construction site.
