Construction Update

July 16, 2020

Paw Creek
Wastewater Pipe Replacement Project
Charlotte Water (CLTWater) and Dellinger Construction are installing a new wastewater pipe to serve customers in the Paw Creek area.

Construction started April 2019 and will be complete by the end of October 2020.

The first pipe installation crew is working south of Pawtuckett Road. They are moving towards the east, south of Tall Tree Lane on Robert L. Smith Regional Park property. The second pipe installation crew is working on Robert L. Smith Regional Park property near Ashford Street, and are moving towards Little Rock Road.

Crews are connecting existing sewer pipes to the new construction. This will occur in various locations through the project. One of these locations is in the roadway at the intersection of Paw Village Road and Yurman Road. Paw Village Road will be closed for an estimated three weeks during construction. Access to and from residences will be maintained. Drivers will be detoured. Updates will be posted on Nextdoor.

The frisbee golf course at Robert L. Smith Regional Park is closed during construction.

Please visit the project website at www.charlottewater.org (click on “projects” then Paw Creek Wastewater Project) for updates on progress.
