Construction is Coming To Your Area Soon

Paw Creek Wastewater Replacement Project
Charlotte Water (CLTWater) will install a new wastewater pipe to serve customers in the Paw Creek area.

Construction may start in October. Crews may begin staging material as early as September.

You are invited to a drop-by meeting at intersection of Sullins Road and Pawtuckett Road (5900 block of Sullins Road) on August 28th from 4:30 - 6:30 pm to learn more about construction and restoration.

Construction of the new pipe will occur in construction easements and road right-of-ways.

WHAT TO:
- **Clearing** - CLTWater removes trees, shrubs, bushes, and other vegetation inside the construction easement before installing the wastewater pipe. When and where possible, trees are preserved.
- **Pipe delivery and storage** – Pipes, manholes, and other materials are delivered and stored within the construction easements and road right-of-ways.
- **Establishing a safe work zone** – Fencing will be put in place and pipe will be stabilized to prevent it from moving.
- **Trench digging** (five to twenty-feet+ deep)
- **Customers may feel a rumble** - crews may remove rock formations by use of small blasting. Areas along the alignment where blasting is required will be determined shortly after site clearing. Residents within 500 foot radius of the blasting sites will be contacted. Blasting is a standard construction procedure and all safety precautions will be taken. Residents may hear a warning horn and feel a slight vibration or rumble similar to a slammed door or thunder.
- **Construction traffic** (excavators, dump trucks) along the creek, within the easements or road right-of-way.

QUESTIONS:
Please visit the project website at www.charlottewater.org (click on “projects” then Paw Creek Wastewater Project) for updates on progress. If you have a question, please call Matt Bedford at 704-336-1009, mbedford@charlottenc.gov or Cam Coley at 704-336-1018, ccoley@charlottenc.gov.
