January 2018 update
Construction is expected to start in April 2018. Details on back.

CharlotteFuture.com/Sidewalks
This project has moved into the bid phase, and construction is expected to begin in April 2018. During this phase, the City takes competitive bids from responsible contractors to perform the construction work. Construction begins after City Council approves selection of the lowest responsible bidder. You can review the bid at CharlotteNC.gov/DoingBusiness.

This project will include the construction of half a mile of new sidewalk along the south side of Rea Road from Swans Run Road to Windyrush Road. Work will include curb and gutter, driveways, wheelchair ramps, storm drainage, pavement markings and utility work.

Construction will take about four months to complete.
