SARDIS ROAD NORTH SIDEWALK PROJECT NEED

The City's Pedestrian Program seeks to install sidewalks on both sides of every Charlotte thoroughfare, which is a public street designed to carry high volumes of traffic over long trip distances through and within the City. City Council approved policies in the **Charlotte WALKS Pedestrian Plan** and the **Sidewalk Installation Policy** to support this program.

The need for sidewalks throughout the city exceeds our available resources. We must focus on where we spend the limited funds for sidewalks. The Sidewalk Installation Policy sets out the process for prioritizing sidewalk projects. These criteria include measurements like:

Pedestrian activity

Proximity to transit services

Traffic volume

Proximity to parks & greenways

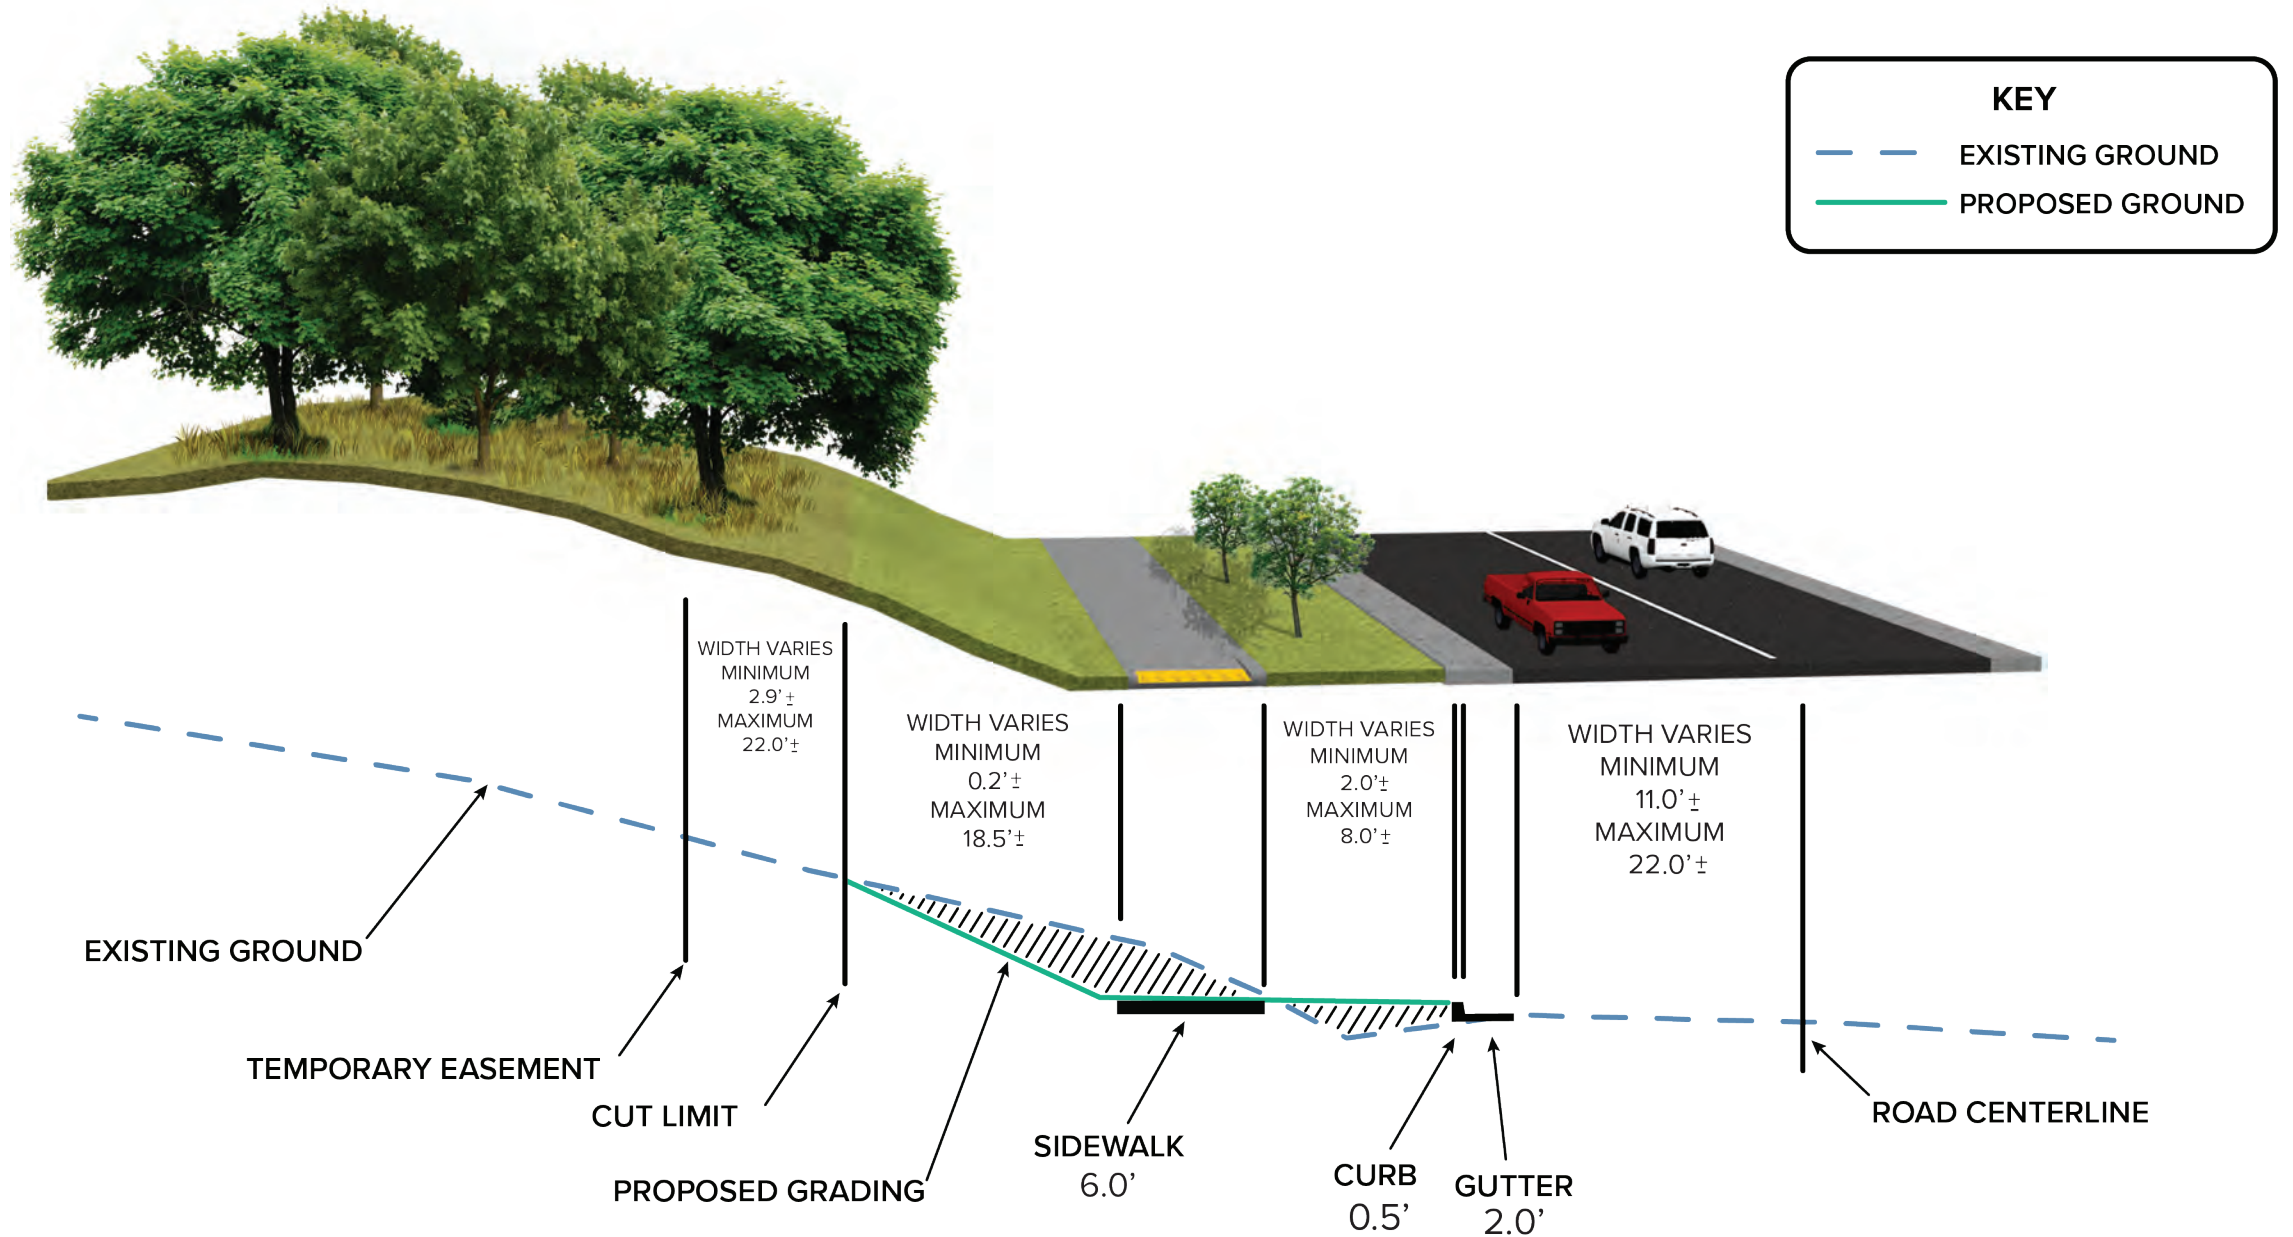

Proximity to neighborhood serving land uses

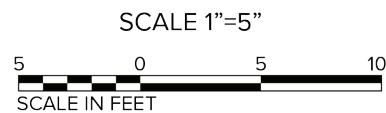

These criteria go through a ranking process to fund projects. This section of Sardis Road North was one of the highest ranking segments citywide. This project was selected for funding several years ago.
