

SHAMROCK DRIVE STREET IMPROVEMENTS UPDATE

PART OF THE CENTRAL/ALBEMARLE/
SHAMROCK COMPREHENSIVE NEIGHBORHOOD
IMPROVEMENT PROGRAM (CNIP)

The first public meeting for this project will be scheduled within the next few months, which will give residents and businesses the opportunity to help the project team create a conceptual design. Invitations will be mailed to nearby residents and businesses once details are determined. See reverse for more details.

The planning phase began in January 2017. Improvements proposed for the roadway from Eastway Drive to The Plaza include sidewalk on both sides, buffered bike lanes, pedestrian medians, street trees, public art and accessible ramps. The first public meeting will be held in the next couple of months to obtain feedback from area businesses and residents. This feedback will help with creating a conceptual design for the roadway.

We are working closely with Charlotte-Mecklenburg Storm Water Services, which is managing the Beckwith/ Meadow storm drainage improvement project that is adjacent to Shamrock Drive. Design and construction will be coordinated between these two projects in order to minimize the effects of construction where possible.
