Charlotte Water and Mecklenburg County Storm Water Services are pleased to provide project updates regarding the Stevens Creek Stream Restoration and wastewater project. To limit community impacts, these projects are being constructed at the same time.

You are invited to learn more at a drop-by meeting at the Mint Hill Town Hall (4430 Mint Hill Village Lane, Assembly Room) on November 15th from 6:00 p.m. - 7:00 p.m.
The stream restoration project will improve and restore approximately 2.3 miles of Stevens Creek. Currently, Stevens Creek is severely eroded. The project will stabilize the stream banks to reduce erosion and improve water quality in the creek.

The wastewater project will install roughly 10,000 linear feet of gravity wastewater pipe. This is one of a handful of ongoing projects intended to initiate the availability of public wastewater service in Mint Hill. The project, in combination with another nearby lift station project, will allow the Oxford Glen package plant to be decommissioned.

**Applying For Wastewater Service**

Property owners are eligible to apply for public wastewater service if their property is within 1,000 linear feet of and able to physically reach the new wastewater pipes. Go to [www.charlottewater.org](http://www.charlottewater.org) (Projects, Stevens Creek and Goose Creek) to review an online map of who can apply for service and application costs.

**During Construction**

Construction can be loud, dirty and inconvenient. Crews will be using heavy equipment and storing materials on-site. Construction will take place beside the creeks in easements. Any damages due to construction will be restored. Crews may remove trees and debris from easements in Stevens Creek Phase 1 during December. Large legacy trees along the edge of the easement will be preserved if possible.

**May Feel A Rumble**

Crews may remove rock formations by blasting or rock hammers. Property owners within 500-feet of blast sites will be contacted and offered a pre-blast survey. Blasting is a standard construction procedure and all safety precautions will be taken. Residents may hear a warning horn and feel a slight vibration or rumble similar to a slammed door or thunder.

**Updates**

Visit [www.charlottewater.org](http://www.charlottewater.org) (click on “projects” drop down, then construction, and select Stevens Creek and Goose Creek) for updates on progress.
