Drinking Water Main Connection Project
Summit Avenue at W. Fourth Street Extension

Charlotte Water (CLTWater) is starting construction on October 29th to connect existing water pipes in the intersection of South Summit Avenue and W. Fourth Street Extension. Construction activity and road repaving will take at least two weeks to complete.

When possible, CLTWater and other city departments schedule neighborhood improvements to minimize disruption. Unfortunately this work was not able to be scheduled with the recent streetscape improvements. CLTWater will mill and repave the Summit Avenue – W. 4th Street Extension intersection immediately upon completion of the water main installation.

**During Construction**
Construction can be loud, dirty and inconvenient. Crews will be using heavy equipment and storing materials on-site. Construction will take place in the road right-of-way. Any damages due to construction will be restored. Please be aware of your surroundings near the construction site and report any safety concerns to the project inspector as soon as possible.

**Property Access (Driveway)**
Construction activities will take place within the street right-of-way. However, driveway and sidewalk access may be limited at times. If you need assistance, please talk to the contractor or call the project inspector.

**Detour, Lane Closures, and Street Parking**
South Summit Avenue will be closed at West Fourth Street Extension for two-to-three weeks. Crews will work in the middle of West Fourth Street Extension. Flaggers will help drivers navigate around. Street Parking may be restricted when construction is in the immediate area.

**Water Outages**
There are no planned water outages for this work. Any unplanned water outages are considered emergencies and will be repaired as soon as possible.

**Discolored Water is Possible**
Construction may cause temporary cloudy, discolored water or lower than usual pressure. If you experience some discoloration in your water:
1. Run the cold water from your outside spigot or tub for 15 minutes.
2. When the water runs clear, run cold water through any taps where discolored water is present.
3. If not clear, call 311 to report issues.
Flowing Hydrants
Residents may see water flowing from hydrants as part of construction activities.

Restoration
Crews will complete a temporary restoration of anything disturbed by construction. Our project inspector can assist with restoration questions.
