The City of Charlotte is in the preliminary planning stages of a future sidewalk project along Tuckaseegee Road that will fill in gaps along various sections of the roadway. The City has retained SEPI, a professional consulting firm, to lead research, outreach and design. In the coming weeks, SEPI will conduct an existing conditions assessment. This involves reviewing areas where sidewalk does not currently exist and checking for the presence of federally protected features such as streams and wetlands, as well as habitats for threatened or endangered species.

The assessment will involve a visual inspection, photographing the area and marking existing features with wooden stakes and nylon ribbons, which will remain in place as reference points throughout the design process. Following the environmental assessment, the project team will reach out the public for their input.

Questions? Contact Mackenzie Nowacki, project manager, at 704-614-6155 or mackenzie.nowacki@charlottenc.gov.
